References covered

TN121

Methodology

PEP has been performed according to the PCR version PEP–PCR–ed3-2015 04 02 and PSR version PSR-0005-ed2-2016 03 29 issued by the PEP ecopassport program.
For further information, please see the website of the program www.pep-ecopassport.org

Reference product

Reference product identification
TN121

PSR product Category :
Balanced connectors

Functional unit

To filter data connection in a multimedia network in residential/tertiary and industrial ares, during 10 years.

The functional unit is based on the use scenario recommended by the PCR for the category of the reference product.

Materials and substances

All useful measures have been adopted to ensure that the materials used in the composition of the product do not contain any substances banned by the legislation in force at the time of marketing.

Plastics	g	%	Metals	g	%	Others	g	%
PC	39.77	28.7%	Ferrites	15.06	10.9%	Cardboard	15.30	11.1%
Epoxy resin	7.28	5.3%	Copper	7.93	5.7%	Glass fiber	9.18	6.6%
PA6	4.55	3.3%	Nickel	4.29	3.1%	Paper	7.50	5.4%
PVC	3.02	2.2%	Iron	3.60	2.6%	Other	2.37	1.7%
Other	8.76	6.3%	Stainless steel	3.20	2.3%			
			Other	5.78	4.2%			
Total mass of reference product :		**138.4 g**						

Manufacturing

These products are manufactured by a site that has received an environmental certification ISO 14001.

Distribution

The packaging has been designed in accordance with current regulations. In particular, the European directive 94/62/CE relative to packaging and packaging waste.
The used packaging is 100% recyclable or recoverable.
Packaging and logistic flows are continuously improved in order to reduce their impact.

Installation

Installation processes
The processes to install the product are not considered in this study because of their weak impact compared to the other life cycles steps.

Installation elements (non delivered with the product)
Elements non delivered with the product and needed to install the product are not considered.

Use

For the considered scenario, the product has an average power of 0.001 W in active mode during 30% of the time. This corresponds to a total energy consumption of 0.019 kWh for the use span of 10 years.

Energy model of the use phase :
Europe

Consumables and maintenance :
None

End of life

Considering the complexity and the lack of knowledge of the electric and electronic recycling channel and processes, the standard scenario set in the PCR is considered.

The recycling potential of the product is: 14%. The calculation of this rate is based on the method of the IEC/TR 62635.

Environmental impacts

Evaluation of the environmental impact covers the following life cycle stages: raw materials + manufacturing (RMM), distribution (D), installation (I), use (U) and end of life (EoL).

All calculations are done with EIME software version 5.8.1 with the database version HAGER-CODDE-2018-11 .
