# 1 About this manual

These instructions are an integral part of the New VegaD enclosures.

## Chapter index

Subject of the manual	5
Warranty and Liability	5

## 1.1 Subject of the manual

This document is intended for users of the flush- and surface-mounted New VegaD enclosures made by Hager. The instruction manual describes both the technology and the product ranges agreed with the respective markets, including accessories and spare parts required at the time of publication. In this manual, some features are described as an USP (Unique Selling Point) and indicate a clear product differentiation on the market at the time of publication. It provides also safety information for electrically skilled persons/the installer about the product's life cycle phases.

- Read and observe this manual before you start working on the enclosure or the switchgear and controlgear assembly.
- Also observe the supplied assembly manual for the respective enclosure or enclosure accessories.
- Store this manual and the assembly manuals in a safe place. The authorised personnel must have access to the manuals at all times.

As technical documentation, the manual should accompany the products described during their entire lifetime and is thus subject to periodical revisions, modifications and adjustments.

## 1.2 Warranty and Liability

These instructions do not extend the Sales and Delivery Conditions of Hager. No new claims concerning the warranty or guarantee, which extend beyond the Sales and Delivery Conditions, can be derived from this instruction manual.

### Liability note

Hager reserves the right to modify or supplement the product or the documentation at any time without prior notice. Hager assumes no liability for typographical errors and any damage which may arise from them.

## 2 For your safety

- Avoid dangers. Adherence to the safety information in this section is a prerequisite for the safe assembly and use of the distribution board.
- Also observe the safety information provided in other sections.

### Chapter index

Proper use	7
Requirements for authorised personnel	8

## 2.1 Proper use

The Hager New VegaD enclosure is a product offering for flush-mounted and surface installations, protected to IP30/40/41, for residential and commercial buildings with a maximum supply current of 160 A.

New VegaD flush enclosures are installed at a depth of 110 mm in the wall. They are available in 6 different heights and 2 different depths.

New VegaD surface enclosures are installed at a depth of 193 mm on the wall. They are available in 6 different heights.

The New VegaD enclosures have been equipped with components from the New VegaD internal fitting system.

Hager's tried and tested New VegaD enclosures and the New VegaD internal fitting system enable the implementation of switchgear and controlgear assemblies according to EN 61439 Part 3 (Distribution boards intended to be operated by ordinary persons / DBO).

### Fixed indoor installation/wall mounting

With its enclosed design, the New VegaD enclosures are intended for stationary, indoor, surface- and flush-mounting in walls/hollow walls. The operating conditions for the indoor installation according to EN 61439 and the maximum ambient temperatures must be observed at the place of installation.

The New VegaD enclosures meet protection types IP30/IP40/IP41 when equipped with internal system and/or closed or slotted doors. The instructions in this manual regarding compliance with the protection type must be observed during installation works.

The New VegaD enclosures are available in protection class II (double insulated). The instructions in this manual regarding compliance with the protection type must be observed during installation works.

For more detailed information, refer to the technical data.

Intended use also includes:

- Reading and observing this manual, the installation manuals and the manuals for the internal fitting system
- Complying with the requirements for authorised personnel.

### Misuse

Any other uses than those mentioned in this chapter as well as any modifications to the distribution enclosure are considered to be misuse. Hager does not assume any liability for damages resulting from misuse.

### Limitation of operating areas

There are certain areas in which the New VegaD enclosure may not be used, in order to prevent hazards or damage to the enclosure.

The New VegaD is not suitable for use:

- in areas that require a higher protection type,
- in areas where ATEX directives must be observed,
- in operating sites at risk of fire,
- in corrosive environments. In particular, the enclosure and internal components can become damaged if used in chlorinated, sulphurous, acidic or saline environments.

## 2.2 Requirements for authorised personnel

- Only qualified electrically skilled persons may assemble, install, commission switchgear and controlgear assemblies, perform extensions, troubleshooting or maintenance and disassemble and dispose of them.
- The qualified electrically skilled persons must have appropriate experience in initial testing and subsequent commissioning, troubleshooting and maintenance.

Product life cycle phase	Minimum training, qualifications or competence
Planning	Electrically skilled person, consultant electrical engineer
Transport, assembly, installation	Electrically skilled person
Commissioning	Electrically skilled person with appropriate testing experience
Operation	Short-circuit devices for operation by ordinary persons inside distribution boards for operation by ordinary persons according to EN 61439-3 (DBO): Ordinary persons All other components must be secured against use by ordinary persons.
Inspection and maintenance	Electrically skilled person with appropriate testing experience
Extensions	Electrically skilled person, planning and documentation required
Disassembly, disposal	Electrically skilled person, only for clearly defined mechanical and electrical work: electrically instructed person

- An electrically skilled person by virtue of their professional training, skills and experience as well as knowledge of the relevant regulations can assess the work assigned to them and identify possible dangers.
- An electrically instructed person must be sufficiently informed and supervised by an electrically skilled person. The instructed person must thus be capable of identifying risks and avoiding dangers as well as dangers due to electricity.
- Anyone who is not an electrically skilled person or an electrically instructed person should always be considered as a non-professional, ordinary person. Non-professional, ordinary persons should never perform work in electrical systems independently or on their own authority. Non-professional, ordinary persons may only operate short-circuit devices intended for use by ordinary persons according to EN 61439-3.

- Standard closing system can be sealed with max Ø 1,5 mm wire

- Standard closing system is available as spare part with reference **FD00S0**

## 5.2 Door mounting into enclosure frames

In New VegaD flush enclosures, customer doesn't have to punch out metal openings for door closing latch, as they are already punched.

Also in New VegaD surface enclosures, customer doesn't have to punch out plastic openings for door closing latch, as they are already extruded.

### 5.3 Door hinges

Each door is composed of 1 fix hinge and 1 removable one.

Both hinge positions can be adjusted up to ~2 mm by hand by turning small wheel (arrow), so that door fits perfectly into frame.

Hinges have a small gasket on metal pin, to prevent water to enter into enclosure and thus preserve IPx1.

Single and spare parts	52

## 6.1 Naming rules

Equipment units, accessories and spare parts for New VegaD system have been named according these rules:

- first 2 letters: always FD
- first number: 0 for equipment units, accessories and spare parts (New VegaD system only)
- second number: 0 for simple accessories and spare parts  
1 for equipment units 1-row height 150 mm  
2 for equipment units 2-rows height 300 mm  
3 for equipment units 3-rows height 450 mm
- third letter: Product type
- third number: Product version

## 6.2 Equipment units

- Equipment units are compatible with surface and flush high-depth versions.
- Equipment units are **not** compatible with flush low-depth versions.

### 6.2.1 FD01.. = Equipment units, height 150 mm

#### FD01A1: Kit for 1 distribution DIN rail (430 x 150 x 147 mm)

- with 1x label holder+paperstrip 24 modules, 4 mounting screws and 2 cable brackets for surface delivered-by
- with 150 mm slotted cover 24 modules.

#### FD01A2: Kit for 1 depth-adjustable DIN rail (430 x 150 x 147 mm)

- with 4 mounting screws, 20 module DIN rail 370 mm long and 2 rail insulating parts delivered-by
- with 150 mm plain cover

**FD01K1: Kit for 160 A MCCB horizontal 3 and 4 poles (430 x 150 x 147 mm)**

- with 1x label holder+paperstrip 24 mod., 1 blanking strip 1,5 module (27 mm) and 4 mounting screws delivered-by
- MCCB H3 or H3+ 3 or 4 poles 160 A to screw-in horizontally
- label holder & paperstrip 24 mod. to cut-out to wished size before snapping-in on cover slot
- **USP: kit enables smallest MCCB mounting volume on the market**
- with a second cover for mounting of MCCB H3+ P160

MCCB fixing on metal plate with M4 screws delivered-by

## 6.2.2 FD02.. = Equipment units, height 300 mm

### FD02A1: Kit with 2 distribution DIN rails (430 x 300 x 147 mm)

- with 2x label holder+paperstrip 24 mod., 4 mounting screws and 4 cable brackets surface delivered-by.
- - with 300 mm 2x slotted cover 24 mod.

### FD02A2: Kit with 2 depth-adjustable DIN rails (430 x 300 x 147 mm)

- with 8 mounting screws and 4 DIN rail insulating parts delivered-by
- with 300 mm plain cover

**FD02A3: Kit with 1 depth-adjustable DIN rail and 1 standard DIN rail (430 x 300 x 147 mm)**

- with 1x label holder+paperstrip 24 mod., 2 cable brackets surface, 8 mounting screws and 2 DIN rail insulating parts delivered-by
- with 300 mm 1x slotted cover 24 mod.

**FD02C2: Kit with depth-adjustable perforated plate (430 x 300 x 147 mm)**

- with 4 DIN rail insulating parts and 12 mounting screws delivered-by
- with Ø 3,2 perforated plate (370 x 290 x 1,2 mm)

**FD02F1: Kit with french DB plate (for Disjoncteur de Branchement) (430 x 300 x 147 mm)**

- with 2x label holder+paperstrip 7 mod. premounted, 4 premounted screws delivered-by
- with removable 7 mod. DIN rail insulation parts
- with 250 x 250 x 40 mm French Gamma platine premounted

**FD02F2: Kit with french DB + linky meter plate (430 x 300 x 147 mm)**

- with 2x label holder+paperstrip 7 mod. and 4 premounted screws delivered-by
- with removable 7 mod. DIN rail insulation parts
- with 250 x 225 x 45 mm French Gamma platine premounted

**FD02K1: Kit for 160 A MCCB vertical 3 and 4 poles (430 x 300 x 147 mm)**

- with 1x label holder+paperstrip 24 mod., 1 plastic elevation part for modular devices, 1 blanking strip 12 mod., 2 cable brackets surface and 4 mounting screws delivered-by
- MCCB H3 3 or 4 poles 160 A to snap-in on DIN rail (MCCB not included)
- Kit also compatible with MCCB H3+ P160 3 or 4 poles

**NB: Cable brackets for FD...N can be also mounted-in on kit in flush high depth enclosure**

**FD02K2: Kit for 250A MCCB (In 160 A) vertical 3 and 4 poles (430 x 300 x 147 mm)**

- with 1x label holder+paperstrip 7 mod. delivered-by
- MCCB H3+ P160 3 or 4 poles 250 A with add-on bloc to screw-in horizontally

**FD02V2: Kit for motorized change over switch 160 A (430 x 300 x 147 mm)**

- with 1x label holder+paperstrip 24 mod., 1 blanking strip 24 mod., 1 positioning aid metallic bar and 4 mounting screws delivered-by
- Kit can be mounted in New VegaD surface FDxxxN and flush high-depth FUxxAN -GN -MN enclosures for mounting modular switches HIC4..A until 160 A.

### 6.2.3 FD03.. = Equipment units, height 450 mm

#### FD03A1: Kit with 3 distribution DIN rails (430 x 450 x 147 mm)

- with 3x label holder+paperstrip 24 mod., 12 mounting screws and 6 cable brackets surface delivered-by
- with 3x 150 mm slotted cover 24 mod.

#### FD03Z1: Kit for meter + main switch three-phase (430 x 450 x 147 mm)

- with French platine kit Tarif bleu triphasé fixed on mounting plate, special cover, 1x label holder+paperstrip (Univers) and 4 pre-mounted screws

## 6.3 Single and spare parts

### 6.3.1 FD00A... = Standard Accessories

#### FD00A1: 10x label holder+paperstrip 24 mod.

- all 24 mod. slotted covers in enclosures and equipment kits are already delivered with 1x label holder+paperstrip 24 mod. to snap-in
- Reference to use as spare part or to double labels on a row (top and bottom, for example for Tebis with 2 outputs)
- paper length 428 mm
- 1-sided printed, other side blank

**FD00A3: horizontal partition plate (surface only) 24 mod.**

**FD00A4: horizontal partition plate (flush high-depth only) 24 mod.**

**FD00A5: horizontal partition plate (flush low-depth only) 24 mod.**

**Partition IP2X to mount in 3 different positions:**

- Pos. 1: direct on uprights (no cut-out, direct use)
- Pos. 2: between field with uprights and field modular (1 side to cut out)
- Pos. 3: between 2 modular fields (2 sides to cut out)

In all positions, it is possible to cut out side areas for vertical trunking access (surface only) or vertical cabling sideways.

See mounting instruction below:

### 6.3.2 FD00B... = Side Brackets for vertical cables

#### FD00B1: 10x side Brackets for vertical cables for surface versions

- all equipped surface enclosures and kits with 24 mod. DIN rails are already delivered with 2 brackets per DIN rail
- Reference to use as spare part or to complete first two-rows in AN or MN versions or to equip GN versions

**USP:** Part can be used in 3 different positions through cut-outs at 2 different points (see arrows):

Pos. 1:  
from top (without cut-out)

Pos. 2:  
from top (with cut-out) for  
trunking fixation

Pos. 3:  
turned 180° (with or without  
cut-out)

**Pos. 1:**

Part can be snapped-in into 3 different depths (20 mm raster) and loosen though finger pressure under orange DIN rail holder.

**Pos. 2:**

Part can be snapped-in into 3 different depths (20 mm raster) and loosen though finger pressure under orange DIN rail holder. Tehalit trunkings BA7A / HA7 can be snapped on part cutted-out like this. Through 20 mm raster, height of vertical trunking cover can be adapted to horizontal trunking cover height (as Tehalit trunkings are 60, 80 or 100 mm high).

**Pos. 3:**

Part can be snapped-in into 3 different depths (20 mm raster) and loosen though finger pressure under orange DIN rail holder. Cover 30 mm width from Tehalit trunking BA7A / HA7 can be snapped on part mounted in this 180° turned position. Through 20 mm raster, height of vertical cover can be adapted to horizontal trunking cover height (as Tehalit trunkings are 60, 80 or 100 mm high).

**FD00B2: 10x side Brackets for vertical cables for flush versions**

- all flush enclosures are already delivered with 2 brackets per DIN rail
- Reference to use as spare part or to complete first two-rows in AN or MN versions or to equip GN versions

- Part can be snapped-in into 1 single position and loosen:
  - through pressure from top with screwdriver on plastic lever (flush low depth)
  - through finger pressure under orange DIN rail holder (flush high depth)

### 6.3.3 FD00C... = Covers

Covers can be mounted on all surface and flush enclosures

#### FD00C1: 300 mm 2x slotted cover 24 mod.

- with 2x label holder+paperstrip 24 mod. delivered-by

#### FD00C2: 300 mm plain cover 24 mod.

- Plain area in the middle: 430 x 268 mm
- 2 slots top/bottom enable fixing of marking strips FD00A1

**FD00C3: 300 mm 1x slotted cover 24 mod.**

- with 1x label holder+paperstrip 24 mod. delivered-by
- 2 slots top/bottom enable fixing of marking strips FD00A1

**FD00C4: 150 mm 1x slotted cover 24 mod.**

- with 1x label holder+paperstrip 24 mod. delivered-by
- 2 slots top/bottom enable fixing of marking strips FD00A1

**FD00C5: 150 mm plain cover 24 mod.**

- 2 slots top/bottom enable fixing of marking strips FD00A1

### 6.3.4 FD00M... = Mounting plates

Mounting plates can be screwed on all surface and flush enclosures, directly on vertical uprights.

#### FD00M1: 215 mm Ø 3,2 perforated plate (434 x 215 x 1,2 mm)

- with 2x10 screws kit for multimedia (10x13 mm & 10x22 mm deep) and 6 mounting screws delivered-by
- 2 plates can be mounted on top of each other within a 3-row empty area (450 mm height) with 10 mm spacing for cable through-out in between

- Plate compatible with device holder **VZ02MM**  and fixing strips **VZ340** (not included)

#### FD00M2: 290 mm plain plate (434 x 290 x 2 mm)

- with 6 mounting screws delivered-by
- plates can be mounted on top of each other (1 each 2 rows empty area) (300 mm height) with 10 mm spacing for cable through-out in between

**FD00M3: 140 mm Ø 3,2 perforated plate (434 x 140 x 1,2 mm)**

- with 2x5 screws kit for multimedia (5x13 mm & 5x22 mm deep) and 4 mounting screws delivered-by
- plates can be mounted on top of each other (1 each 1 row empty area) (150 mm height) with 10 mm spacing for cable through-out in between

- Plate compatible with device holder **VZ02MM** and fixing strips **VZ340** (not included)

**FD00M4: 140 mm plain plate (434 x 140 x 2 mm)**

- with 4 mounting screws delivered-by
- plates can be mounted on top of each other (1 each 1 row empty area) (150 mm height) with 10 mm spacing for cable through-out in between

### 6.3.5 FD00G... = Gallery Adapter for VegaD surface versions (FD...)

FD00E1 (Adapter for Systo range) has been replaced by FD00G1 (Adapter for Gallery range), as Systo range has been phased out.

#### FD00G1: Adapter for Gallery range

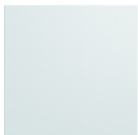

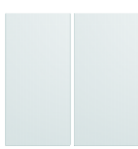

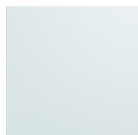

#### Gallery compatibility

**Note:** In this overview table, the last reference letter **B** stands for pure white. Other colours are also available:  
**D** Oyster white, **T** Titane, **N** Black, **E** Orange, **R** Red, **V** Green.

All Gallery products 47 mm wide are not all compatible with Gallery adapter. Compatibility check on demand.

Example: push buttons WXF610 and 611 are not compatible with FD00G1 because the wiring interferes with the plastic walls of the adapter.

**Protection cover compatibility**

FD00G1 is also compatible with IP41 protection cover **WS179** and other 91... refs from Berker, that can be snapped-in:

**Socket dismantling:**

Step	Action
1	Unscrew socket front cover
2	4 x unsnap with small flat screwdriver socket snaps (from outside or inside) and push socket out of enclosure
3	2 x unsnap adapter snaps with heavy finger pressure top/bottom or left/right hand side

⇒ See mounting instruction

To dismantle a socket outlet, it is necessary to unscrew front plate and unsnap back plate with small flat screwdriver while pushing out back plate from the inside with the second hand.

### 6.3.6 FD00F... = Fixation kit

#### FD00F1: Fixation kit (for surface versions only)

- to associate 2 surface enclosures vertically
- to associate 2 surface enclosures horizontally

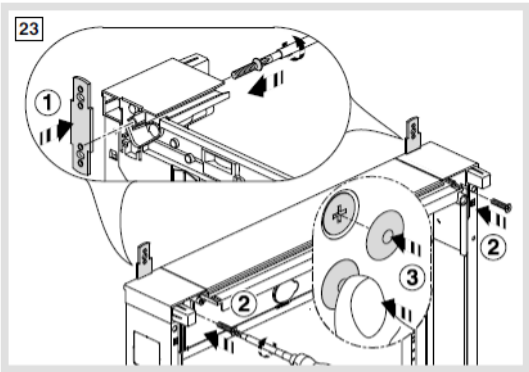

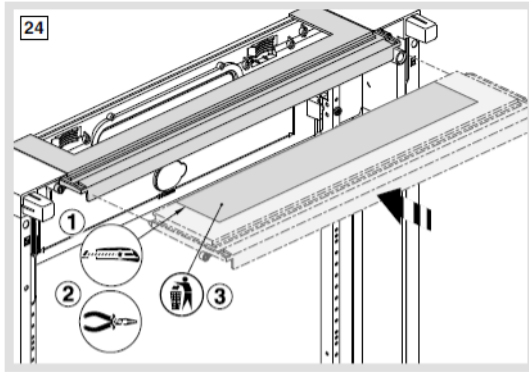

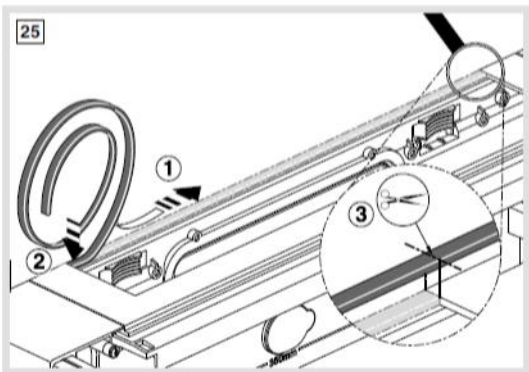

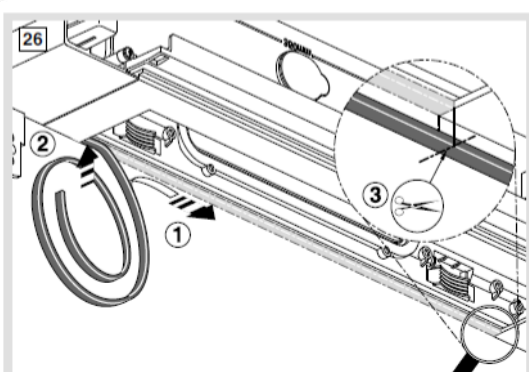

#### Vertical association (first enclosure already wall-mounted)

Needed are following parts:

Step	Action
1	Perforate holes left/right hand side with screwdriver and hammer [22]

Step	Action
2	<p data-bbox="496 226 1353 293">Insert fixing plates from the top and screw them from the inside with M6 screws [23]</p> 
3	<p data-bbox="496 685 1353 752">Cut cable entry plate opening as wished and stick gasket in between [24] [25] [26]</p>   

Step	Action
4	Insert top enclosure through fixing plates above first enclosure [27]
5	Screw them from the inside with M6 screws [27]
6	Put insulation caps above all M6 screw heads [27]

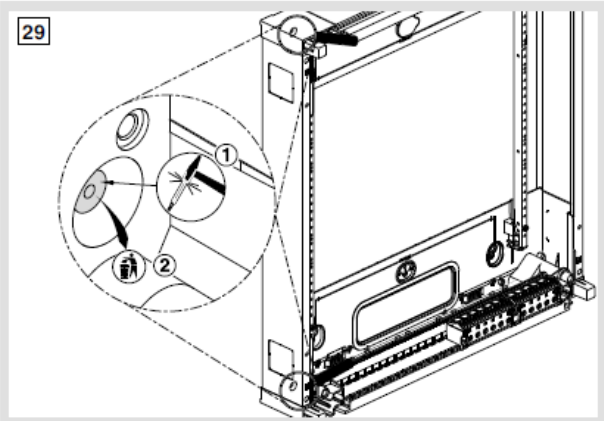

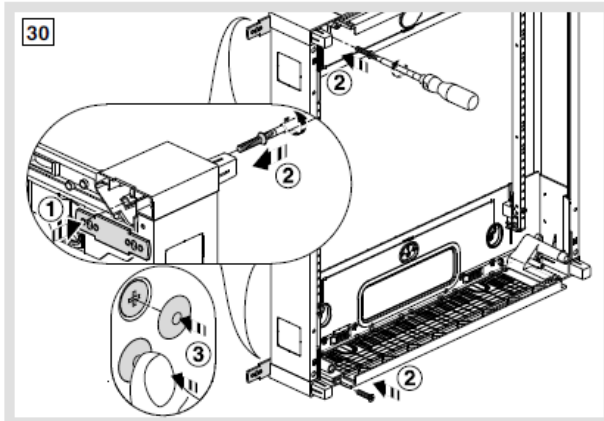

**Horizontal association (first enclosure already wall-mounted)**

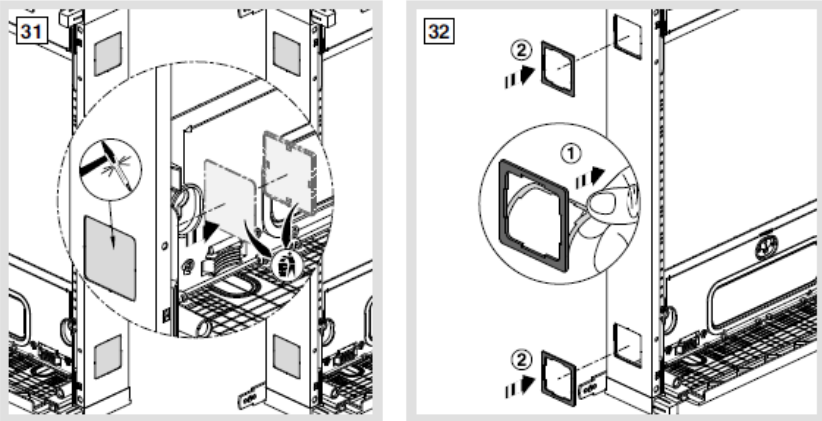

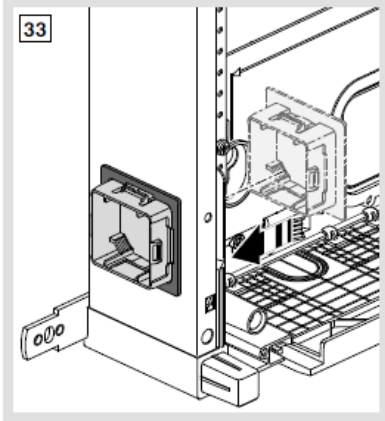

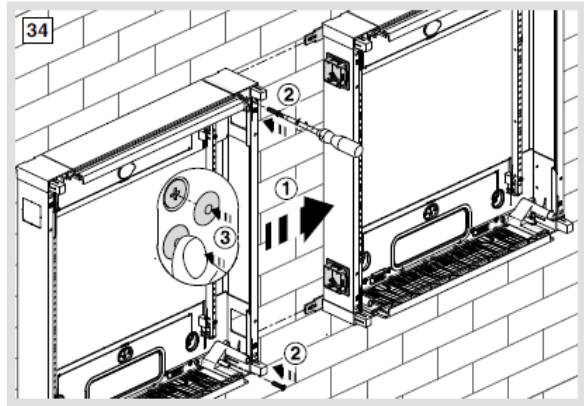

Needed are following parts:

Step	Action
1	<p data-bbox="497 1077 1347 1115">Perforate holes top/bottom side with screwdriver and hammer [29]</p> 
2	<p data-bbox="497 1563 1347 1630">Insert fixing plates from the side and screw them from the inside with M6 screws [30]</p> 

Step	Action
3	<p>Perforate side openings with a hammer and stick gasket around them [31] [32]</p> 
4	<p>Insert side plates top/bottom from the inside [33]</p> 
5	<p>Snap second enclosure from the side over fixing plates [34]</p> 
6	<p>Screw them from the inside with M6 screws [34]</p>
7	<p>Put insulation caps above all M6 screw heads [34]</p>
8	<p><b>Fix second enclosure at the wall with both hands free (USP)</b></p>

**Horizontal association or vertical association with both enclosures on table**

⇒ Same process as related above plus following step:

- Reinforce stability of assembly by 4x screwing top/bottom plastic parts of the enclosure with metallic back panel with 4 small screws delivered-by

**FD00F2: Fixation kit (for surface versions only)**

- to mount a surface enclosure with 4 external fixing plates

Step	Action
1	<p>Perforate holes left/hand right side and top/bottom with screwdriver and hammer [37]</p>

Step	Action
2	Insert external fixing plates from the top and screw them from the inside with M6 screws [38]

3	Reinforce stability of assembly by 4x screwing top/bottom plastic parts of the enclosure with metallic back panel with 4 small screws delivered-by [39]
---	---

Distances between fixing holes: Width = 480 mm / Height = Enclosure height + 50 mm

**FD00F3: Bar for cables fixation (for surface and flush versions)**

- to fix incoming / outgoing cables with cable straps

⇒ Part delivered-by in each AN and DN surface version.

Up to 9,5 mm width for big cable tie fixing

### 6.3.7 FD00H... = DIN rail Holders for equipment units

#### FD00H1: 2x Base element for DIN rail fixation (for surface, flush high-depth and flush low-depth versions)

- to use as spare part or to complete first two-rows in AN or MN versions or to equip GN versions
- part to snap-in on vertical upright and 1x to screw-in each 150 mm
- with 6 standard mounting screws delivered-by (2 for DIN rail fixation)
- kit to complete with FD00H2 and UZ02B9

#### FD00H2: 2x Top element for DIN rail fixation (for surface and flush high-depth versions)

- to use as spare part or to complete first two-rows in AN or MN versions or to equip GN versions
- part to slide-in on base element FD00H1
- not compatible with flush low-depth versions
- with 4 standard mounting screws delivered-by for DIN rail fixation
- for more stability or big devices, the part can be screwed to the base element at 2 places (see arrow below) with the 13 mm long screws (4x delivered-by in this kit)

### 6.3.8 FD00Q... = Quick-Connect & terminal holder

**FD00Q1: 1x Quick-Connect holder (for surface, flush high-depth and flush low-depth versions)**

- to use as spare part or to complete 22, 32, 42 or 52 versions (delivery form with only 1)
- Part to snap-in on back panel top/bottom plastic part
- Part can be optionally 2x screwed to back panel top/bottom plastic part with 4 screw bag delivered-by
- Fixation screws are the same than for P1, P2 and P3 cable entry plate fixing (Ø 4x16 mm).
- max. input: 80 x 4 mm<sup>2</sup> / 24 x 25 mm<sup>2</sup>

#### Earth Terminal Blocks

	Description	Width	Reference

### 6.3.9 FD00P... = Plate for cable entry

**FD00P1: 1x Plate for cable entry (Slider) with rectangular openings (for surface, flush high-depth and flush low-depth versions)**

- Slider included top/bottom in each surface and flush version
- Reference to use as spare part
- For better stability, the plate can be 2x screwed to back panel top/bottom plastic part with 4 screw bag (Ø 4x16 mm) delivered-by

Maximum rectangular area for cable entry: 420 x 80 mm

**FD00P2: 1x Plate for cable entry (Slider) with 2 water-proof flanges IP41 (for surface, flush high-depth and flush low-depth versions)**

- Slider with 2 water-proof flanges IP41 to mount-in
- Reference to use for water-proof direct cable throughout
- The water-proof flanges can be ordered as single parts under **VZ741**
- For better stability, the plate can be 2x screwed to back panel top/bottom plastic part with 4 screw bag (Ø 4x16 mm) delivered-by

**FD00P3: 1x Plate for cable entry (Slider) with tube openings (for surface, flush high-depth and flush low-depth versions)**

- Slider with pre-perforated rounded openings for tubes
- For better stability, the plate can be 2x screwed to back panel top/bottom plastic part with 4 screw bag (Ø 4x16 mm) delivered-by

<sup>[1]</sup> per half

**FD00P4: 2x Plate for cable entry (Side plate) (for surface versions only)**

- **USP: M40 cable gland head can be screwed directly into side plate winding (without its screwing ring)**
- M25 cable gland can also be mounted-in (with its screwing ring)

**FD00P5: 2x Side plate for aeration (for surface versions only)**

Aeration grid reduces IP41 to IP30. For mounting see page 85.

Power loss effect +27 % to 64 % with kit mounted asymmetrically (for example top left- and bottom right-hand side) on distribution enclosure FD (see also chapter 'power loss' starting on page 123).

**FD00P6: Side plate for cable entry with M40 flange (for surface versions only)**

- Composed of a plastic adapter with gasket and of a water- and dust-proof round black flange M40 screwed-in. For mounting see page 85.
- Round flange with 6 openings for following cable diameters:
  - 1 x 2,0 – 4,0 mm
  - 2 x 3,0 – 6,0 mm
  - 2 x 5,0 – 9,0 mm
  - 1 x 7,5 – 12,0 mm
- **USP: Openings can be reclosed with finger touch and contain a cable strain relief functionality**
- For mounting see page 85.

**VZ741: New VegaD cable entry flange IP41**

- The flange can be snapped-in on back panel of surface and flush enclosures after cut-out of plastic wall
- All enclosure back panels can receive 2 flanges for cable back entry (top and bottom)
- Reference is also part of slider **FD00P2**
- This flange is also mounted in Vector boxes VE...

### 6.3.11 FD00T... = Trunking

For having a nice parallel cable management from MCBs with 1 or 2 outgoing (18 mm or 9 mm distance between wires) to horizontal cable tray, a new cutting tool has been made for BA7A profiles.

The resulting cable trays have 9 mm distance between slots and are available under FD00T1 and FD00T2 product codes.

#### FD00T1: 4x horizontal cable tray kit 80x30 with 9 mm interslot distance in PVC

- dark grey colour RAL 7030
- 438 mm width for horizontal quick fixing between 2 rows without tool
- delivered with covers
- BA7A profile basis
- **not compatible with flush low-depth, as 80 mm height would collide with cover**

Horizontal trunking can be quickly fixed between 2 rows without tool, simply by clipping it on black base element FD00H1 (see red arrows in graphic on next page).

**FD00T2: horizontal trunking kit 80x30 with 9 mm interslot distance halogen-free**

- soft grey colour RAL 7035
- 438 mm width
- delivered with covers
- HA7 profile basis
- **not compatible with flush low-depth, as 80 mm height would collide with cover**

Both horizontal trunkings can be quickly fixed between 2 rows without tool, simply by clipping them on black base element FD00H1 (see red arrows).

Standard BA7A profile with 12,5 mm interslot distance are also compatible with New VegaD fixing, but have to be cut from 2 m profile to 438 mm length by the installer.

Thus, it is also possible to clip-on smaller BA7A profiles cut to 438 mm like 40x30 or 60x30 in flush low-depth enclosures. See compatibility below:

BA7A range (PCV) RAL 7030 dark grey		HA7 range (PC/ABS) RAL 7035 soft grey		For all New VegaD surface and flush
BA7A40030	40x30 mm	HA740030	40x30 mm	
BA7A60030	60x30 mm	HA760030	60x30 mm

BA7A100030	100x30 mm	HA7100030	100x30 mm	

### 6.3.12 BA7A/HA7... = vertical trunkings sideways

BA7A and HA7 trunking references shown in table above are compatible with brackets FD00B1 (see page 56) and can be mounted vertically in New VegaD surface enclosures. Thus, it is possible to combine horizontal and vertical trunkings to get a clean installation picture.

### 6.3.13 FZ... = Univers cable storage and hiding box

In order to hide incoming cables over a New VegaD surface enclosure like FD52..., customer can "puzzle" a wooden-based bulky storing box or can order cable storing ducts FZ..., developed for the Univers range:

### 6.3.14 UZ...V. = Univers N cable brackets

#### UZ01V1: 20x adapter for cable bracket Univers N

- The adapter can be mounted on standard Univers DIN rail in each hole with flower shape
- The adapter can receive small bracket UZ25V2 (surface, flush high-depth and flush low-depth versions) or big bracket UZ25V1 (surface and flush high-depth versions only)

#### UZ25V1: 20x big bracket for cables Univers N

- Part to snap-in on adapter UZ01V1
- Single cover UT50C from cable tray Univers can be snapped on its top to hide cables below

#### UZ25V2: 20x small bracket for cables Univers N

- Part to snap-in on adapter UZ01V1
- Single cover UT50C from cable tray Univers can be snapped on its top to hide cables below
- Part can be also mounted 180° without adapter under standard Univers DIN rail in each hole with flower shape (surface and flush high-depth versions only)

**ZZ41SF: Lock nuts for vertical upright fixing as spare part**

Lock nuts are required on each corner of the internal equipment system for screwing the vertical uprights to the enclosure body. They are premounted in every New VegaD enclosure.

Kit ZZ41SF (composed of 4 counterparts 5G000200) can be ordered separately, if for any reason one is missing.

ZZ41SF

In ZZ41SF, SF stands for "Screw Fixation".

## 7.2 Packaging use at the workshop or at the construction site

As both surface & flush protective cardboards are made of 2 pieces, New VegaD enclosure packagings are very easy to open. At the workshop or at the construction site, it is also recommended to use the first half for protecting frame or frame with door and the other half to for protecting back panel, chassis or door.

## 8 Wall fixation

### Chapter index

Wall-mounting for surface enclosures	115
Flush-mounting for flush enclosures	116
Plaster protection in flush enclosures	119

### 8.1 Wall-mounting for surface enclosures

There are 4 fixation holes (already perforated) at the edges and 2 in the middle (to cut/punch out) to use as pre-fixation.

4 fixation holes at the edge have been enlarged to ease introduction of screw head and its grommet

All FD enclosures are delivered with 5 plastic caps for covering fixation holes.

There are also 4 external fixation plates with key holes that can be used for wall-mounting. They are available with accessory **FD00F2**.

## 8.2 Flush-mounting for flush enclosures

Flush holes dimensions are given by dims H2 and 581 mm in mounting instruction.

To ensure IP30 protection without door, a depth adjustment of the frame of 15 mm max. is recommended. Frame can be depth-adjusted until 23 mm above back panel by flush high-depth and more than 35 mm by flush low-depth.

For hollow-wall fixation, the kit **VZ405N** can be used. Minimal hole dimensions for hollow-wall mounting should be 551 mm width x total height – 30 mm (example: 1257 x 551 mm by FU72DN). See needed dimensions for flush hole below.

### Flush fixation with hollow-wall kit VZ405N

Hollow-wall opening dimensions:

\* = 3 rows

### Flush fixation with side plates

Wall opening dimensions:

Side plates to bend out with screwdriver

\* = 3 rows

Kit VZ405N can be mounted horizontally or vertically until 30 mm wall thickness:

For hollow-wall installation it is recommended to support the lower edge of the enclosure by an accordingly designed opening, see following pictures. This ensures a good fixation over the years.

It is recommended to screw-in kit VZ405N with max. 2 Nm torque.

Another new feature in New VegaD flush enclosures is the possibility to cut out the plastic top/bottom part for inserting back panel in a hollow-wall with cable arrivals both sides top/bottom. It is only possible with an added opening in back panel. For this, a line has been designed on the plastic part (black line on the picture), so that the installer can follow it with a cutter and needs only to cut out plastic.

As for surface enclosures, a mounting hole has been created in top/bottom plastic part from back panel for inserting a special water level. This level can be removed with a flat screwdriver. Water levels can be ordered by Market Area at production site in Blieskastel (Germany).

### 8.3 Plaster protection in flush enclosures

Each flush enclosure is delivered with a plaster protection cardboard to fix on back panel.

Cardboard protection is the same for flush low-depth and flush high-depth, but has to be bent and may have to be turned 180° depending on flush depth to protect.

Flush high depth:  
bending to exterior side

Flush low depth:  
bending to interior side

red = bending line

2 x pre-perforated holes  
for finger taking

red = bending line

Rated operational voltage and frequency: 400 / 230 V AC, 50 Hz

Rated current: up to 160 A

Protection class: Class II

Protection degree (of surface enclosures): IP30 without door  
IP41 with door

Protection degree (of flush enclosures): IP30 without door  
IP40 with door

Indoor and/or outdoor installation for indoor installation

Data for air / leakage distance (clearance and creepage distances)

Overvoltage category: III

Pollution degree: 3

Rated insulation voltage (U): AC 400 V

IK Codes: IK08 with door  
IK07 without door

Glow wire test according DIN EN 60695:

- 960 °C for active parts
- 850 °C for flush plastic parts mounted behind wall-surface
- 750 °C for other parts (European minimum requirement is 650 °C, but French prescription for public buildings requires 750 °C)

PVC content:

All plastic parts from enclosure are halogen-free, excepted paper strip holders (PVC).

All FD accessories are halogen free except cable trunking FD00T1. Halogen free trunking exist under reference number FD00T2.
