

# Release Note v7.0.5.0

## Bugs Fixing

- Derating when charge in progress and  $T > 60^{\circ}\text{C}$
- Greencharging in Exclusive mode with 3 phases
- Switch3to1= "1P" and DN="Loadshedding" not correctly taken into account
- Overconsumption error (3 blinks) is not triggered and then load continue infinitely after the 1' timeout

## Improvements

- Push TIC card presence to the cloud (needs for Witty Start Connected)
- Neutral disconnection detection (error "134")
