

GB

ECR140D

Ein Phasen-Energiezähler, Direktanschluss 40 A mit MID-Konformitätserklärung und Modbus RTU Kommunikation. Die MID-Zertifizierung betrifft nur die Wirkenergie. Bedienungsanleitung EU-Konformitätserklärung: Download von: http://ngr.io/r/ecr140d

Sicherheitsanweisungen

- Einbau und Montage in Innenbereichen dürfen nur durch eine Elektrofachkraft gemäß den geltenden lokalen Installationsstandards durchgeführt werden. Ein- Ausbau des Produktes nur bei ausgeschalteter Spannungsversorgung. Jegliche Eingriffe an den Produkten, einschließlich der Gehäuse, im Falle von Störungen oder Mängeln, können die Sicherheit des Betreibers gefährden...

Funktion

Dieses Modbus RTU-Messgerät misst die Wirkenergie, die in einer elektrischen Installation verbraucht wird. Dieses Gerät kann bis zu 8 über Kommunikation gesteuerte Tarife verwalten. Gemäß der Messgeräterichtlinie (MID) darf nur das Register der gesamten positiven Blindenergie für die Rechnungsstellung berücksichtigt werden.

Leistungsfaktor Übereinstimmung gemäß IEC 62053-23:2020

Geräteaufbau

Technical details of the meter's construction, including LCD display, energy register, and terminal block. Includes a diagram of the meter and a list of symbols.

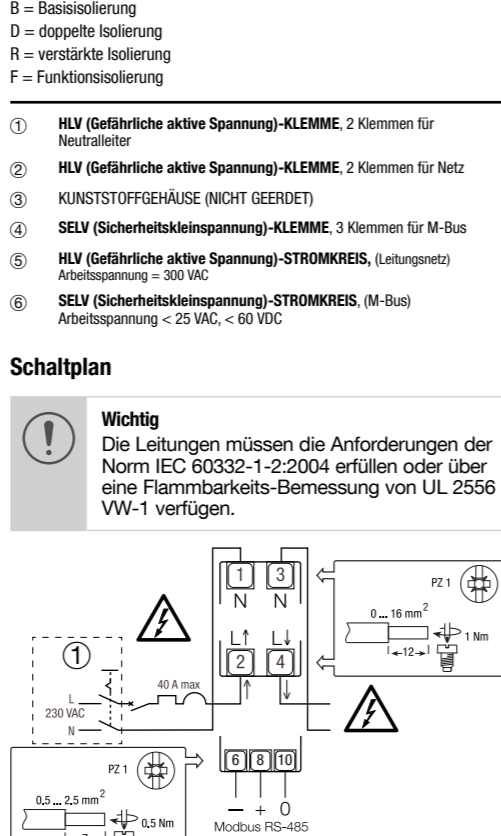

Abmessungen

Anschluss

Modbus RTU Kommunikation section with recommendations, protocol details, and a wiring diagram showing terminal connections for power, communication, and ground.

Schaltplan

Installation

Das einspeisende Schalt- oder Schutzgerät (Nummer 1 im Anschlussplan) muss leicht zu identifizieren bzw. zu bedienen und zudem nahe am Zähler installiert sein.

Inbetriebnahme

Empfehlungen: Folgende Punkte müssen vor der Inbetriebnahme beachtet werden: Sicherstellen, dass keine gefährliche Spannung an den SELV-Klemmen anliegen.

Wartung

Sicherstellen, dass keine Spannung am Energiezähler anliegt. Es darf nur eine Trockenreinigung mit einem Naturfasertuch (bspw. aus Baumwolle) oder einem Tuch aus synthetischem Stoff...

Hilfe bei Problemen

Fehlerbedingung: Bei blinkender Teil-Energie, Teil-Energieregister zurücksetzen (Register für maximale Teilenergie). Wenn auf dem Display die Meldung ERROR N02 oder ERROR N03 angezeigt wird...

Large diagram showing the Modbus register map. It lists various registers (e.g., Zählertyp, Importierte Wirkenergie, Spannung, Strom, Frequenz, Leistungsfaktor) and their addresses, along with instructions on how to navigate and modify values using the meter's buttons.

Technische Daten

Table of technical data including general characteristics (Gehäuse, Montage, Tiefe), bedienfunktionen, specification limits (Spannungsbereich, Strombereich), and safety information (Betriebsklasse, Schutzklasse).

6LE005486B

GB

ECR140D

One phase energy meter, direct connection 40 A with MID declaration of conformity and Modbus RTU communication
MID certification concerns active energy only.
User instructions
EU declaration of conformity:
Download from: <http://hgr.io/r/ecr140d>

Safety instructions

- This device must be installed indoor only by a professional electrician fitter according to local applicable installation standards.
- Do not plug in or unplug this product when the power supplying is ON. Its use is only permitted within the limits shown and stated in the installation instructions. The device and the equipment connected can be destroyed by loads exceeding the values stated.
- Any type of intervention on the products, including cases in which they cease to function or present defects, can be dangerous for the operator's safety and relieves the Manufacturer from all civil and criminal liability.

Function

This Modbus RTU meter measures the active energy used in an electrical installation. This device can manage up to 8 tariffs controlled via communication. Only the total active energy register can be used for billing purposes according to measuring instrument directive (MID).
- Active Energy Class B (according to EN 50470-3:2022)
- Active Power Class 1 (according to IEC 62053-21:2020 and IEC 61557-12:2018)
This device has a LCD and 1 push-button key to read Energies, V, I, PF, F, P. The design and manufacture of this meter comply with Standard EN 50470-3:2022 requirements.

Power factor Convention according to IEC 62053-23:2020

LCD display:

Energy register (kWh), not resettable
Energy import (consumption →)
Energy export (production ←)

5000 imp/kWh
Optical metrological LED

Note: If no button is pushed for at least 20 seconds the display goes back to the Main Page and the backlight is switched off again.

MID certified

Symbols

- One phase
- Protected by double insulation (Class II)
- Backstop: Reversal preventing device

Dimensions

Sealable terminal cover

Dimension

Modbus RTU Communication

Recommendations
Use HTG485H reference cable specially developed as accessory by Hager.

Modbus protocol

The Modbus protocol operates on a master/slave structure:
- Reading (Function 3),
- Writing (Function 6 or 16), broadcast option at address 0.
The communication method is RTU (Remote Terminal Unit) with hexadecimal.

Important

It is essential to connect a resistance of 120 Ohms at the 2 ends of the connection.

Intended use

The Energy Meter is suitable for use on both impedance grounded networks and not grounded networks.

There are no accessible parts

Legend:

- B = Basic Insulation
- D = Double Insulation
- R = Reinforced Insulation
- F = Functional Insulation

- HLV TERMINAL, 2 terminals for neutral
- HLV TERMINAL, 2 terminals for line
- PLASTIC CASE (NOT EARTHED)
- SELV TERMINAL, 3 terminals for M-Bus
- HLV CIRCUIT, (mains) working voltage = 300 Vac
- SELV CIRCUIT, (M-Bus) working voltage < 25 Vac, < 60 Vdc

Wiring diagram

Important

Cables must therefore comply with IEC 60332-1-2:2004 or have a flammability rate UL 2556 VW-1.

The four-pole disconnector (reference 1) in the wiring diagrams must be easy to identify and to operate and must be close to the Meter. They both must be in "OFF" position (open circuits) from the beginning to the end of the installation or of the uninstallation. The Energy Meter, the disconnectors and the overload current protection devices must be easily identifiable. They must be installed in an adequate cabinet (IP51 and V1) and it must be easy to intervene on them if necessary. Inside the cabinet, do not install any other device with a flammability class worse than V1.

Commissioning

Recommendations

- Check the following before putting it into service:
 - Make sure that no dangerous voltages are connected to the SELV terminals.
 - Make sure that a phase has not been connected to the Neutral terminal (this would cause the internal protections to intervene and will damage the Meter).
 - Check that the main page appears on the display (see menu description) and not the Phase Sequence Error page.

Maintenance

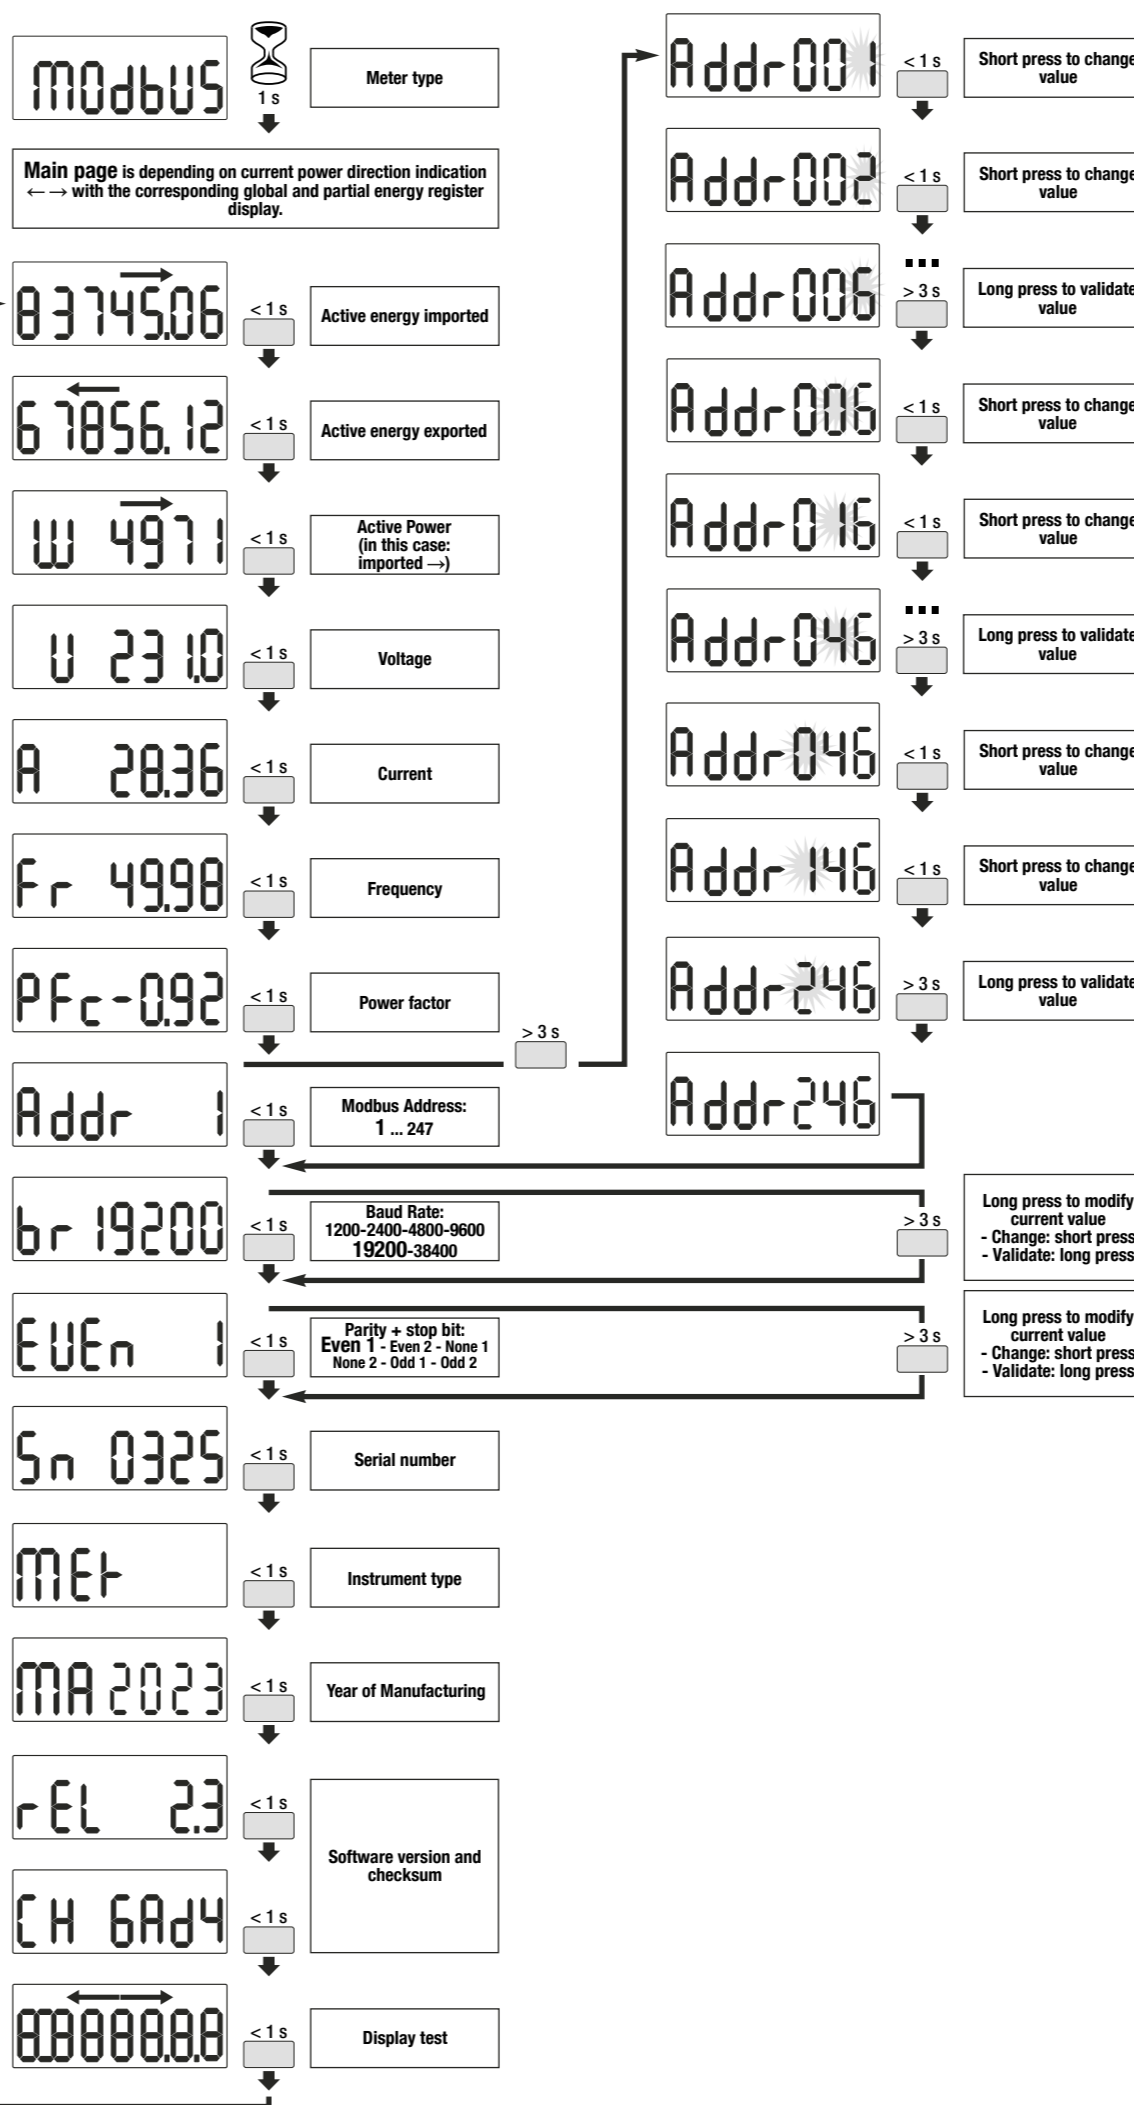

- Make sure that no voltage is applied to the instrument.
- Only dry cleaning is allowed with a natural fiber cloth (for example cotton or linen) or synthetic fabric that does not leave residual fibers that can remain on the surface of the Energy Meter or that can penetrate into the Energy Meter.

For this Energy meter, no maintenance, repair or replacement of parts is foreseen. Such interventions are to be considered prohibited. In case of malfunction, it must be replaced.

Help in case of problems

Error condition

When partial energy blinks, reset partial energy (maximum partial energy register). When the display shows the message ERROR N02 or ERROR N03, the meter has got a malfunction and must be replaced.

Data in compliance with EN 62052-11:2021+A11:2022, EN 62052-31:2016-06, IEC 62052-31, EN 62059-32-1:2012

General characteristics			
Housing	DIN 43880	DIN	1
Mounting	EN 60715	DIN rail	35 mm
Depth		mm	60
Weight		g	60
Operating features			
Connection	to single-phase network - number of wires		- 2
Storage of energy values and configuration	Internal flash non volatile memory		- <input checked="" type="checkbox"/>
Approval (EN 62052-31:2016-06 EN 50470-3:2022)			
Reference Voltage (Un)		VAC	230
Reference Current (In)		A	5
Minimum Current (Imin)		A	0.25
Maximum Current (Imax)		A	40
Starting Current (Ist)		A	0.015
Transitional Current (Itr)		A	0.05
Reference Frequency (fn)		Hz	50
