Full test program:
18-0680, 18-0681, 18-0682, 18-0683, 18-0684, 18-0685, 18-0686, 18-0687, 18-0688, 18-0689, 18-0690, 18-0691, 18-0692, 18-0693, 18-0694 VERSION PUSH BUTTON

Full test program:
18-0695, 18-0696, 18-0697, 18-0698, 18-0699, 18-0700, 18-0701, 18-0702, 18-0703, 18-0704, 18-0705, 18-0706, 8-0707, 18-0708, 18-0709

## Testing location:

AB Plast s.r.I - Hager Group
Via dell'Artigianato 6
25080 Molinetto di Mazzano (BS) Italy

## Summary of compliance with National Differences (List of countries addressed):

No national difference
$\square$ The product fulfils the requirements of $\qquad$ (insert standard number and edition and delete the text in parenthesis, leave it blank or delete the whole sentence, if not applicable)

## of marking plate:

The artwork below may be only a draft. The use of certification marks on a product must be authorized by the respective NCBs that own these marks.

All the following data, images and barcode are realized by laser technology.

| Possible test case verdicts: |  |
| - test case does not apply to the test object ................: | N/A |
| - test object does meet the requirement | P (Pass) |
| - test object does not meet the requirement................: | F (Fail) |
| Testing ............................................................ |  |
| Date of receipt of test item ....................................: | June 2018 |
| Date (s) of performance of tests .............................: | June-July 2018 |

## General remarks:

This document is issued by the company under its General Conditions of Service accessible at http://www.sgs.com/terms_and_conditions.htm. Attention is drawn to the limitation of liability, indemnification and jurisdiction issues defined therein. Any holder of this document is advised that information contained hereon reflects the Company's findings at the time of its intervention only and within the limits of Client's instructions, if any. The Company's sole responsibility is to its Client and this document does not exonerate parties to a transaction from exercising all their rights and obligations under the transaction documents. Any unauthorized alteration, forgery or falsification of the content or appearance of this document is unlawful and offenders may be prosecuted to the fullest extent of the law.
Unless otherwise stated, the results shown in this document refer only to the sample(s) tested. This document cannot be reproduced except in full, without prior approval of the company.
The test results presented in this report relate only to the object tested.
This report shall not be reproduced, except in full, without the written approval of the Issuing testing laboratory.
"(see Enclosure \#)" refers to additional information appended to the report.
"(see appended table)" refers to a table appended to the report.
Throughout this report a comma (",") is used as the decimal separator.

| Rocker references | Product Description | Module nbr |
| :--- | :--- | :--- |
| Image |  | 2 module |
|  |  | WXD000xx Rocker standard |
|  |  | WXD001xx Rocker with light indicator |

| WXD300xx Rockers for shutter switch with arrow up-down | 2 module |
| :--- | :--- | :--- | :--- |

|  | MARKING |  |
| :--- | :--- | :--- | :---: |
|  | General |  |
|  | Switches are marked with: | P |
|  | a) rated current(s) (A or AX)....................................................................................................................................................................................................................................................................................................................................................................................................................................: |  |$\quad$|  |  |
| :---: | :---: |
|  | b) rated voltage(s) (V) |

| IEC 60669-1 |  |  |  |
| :--- | :--- | :--- | ---: |
| Clause | Requirement + Test | Result - Remark | Verdict |

|  | Markings as given in 8.1 a), b), c), d), e) and, if applicable, f), g), h), k), and I) shall be placed on the main part of the switch |  | P |
| :---: | :---: | :---: | :---: |
|  | Parts such as cover plates, which are necessary for safety purposes and are intended to be sold separately, are marked with the manufacturer's or responsible vendor's name, trade mark or identification mark and type reference |  | P |
|  | Markings as given in 8.1 i ) and j), when applicable, are marked so as to be easily discernible when the switch is mounted and wired as in normal use |  | N/A |
|  | Markings are placed on parts which cannot be removed without the use of a tool |  | P |
| 8.4 | Marking on terminals for phase conductors |  |  |
|  | Terminals intended for the connection of phase conductors (supply conductors) are identified unless the method of connection is of no importance, is self-evident or is indicated on a wiring diagram |  | P |
|  | Indications not placed on screws or other easily removable part |  | P |
|  | Alternatively, the surface of such terminals shall be bare brass or copper, other terminals being covered with a metallic layer of another colour |  | N/A |
|  | For switches of pattern numbers $2,3,03$ and 6/2, terminals associated with any one pole have similar identification, if applicable, differing from that of the terminals associated with the other poles, unless the relationship is self-evident |  | P |
| 8.5 | Marking on terminals for neutral and earth conductors |  |  |
|  | Neutral terminals: N..............................................: |  | P |
|  | Earthing terminals: [earth symbol (IEC 60417- 5019:2006-08)] |  | N/A |
|  | Markings not placed on screws or other easily removable parts |  | P |
|  | Terminals for conductors not forming part of the main function of the switch: |  |  |
|  | - clearly identified unless their purpose is selfevident, or |  | P |
|  | - indicated in a wiring diagram fixed to the accessory |  | P |
|  | Identification of switch terminals may be achieved by: |  |  |
|  | - their marking with graphical symbols according to IEC 60417 or colours and/or alphanumeric system, or |  | P |
|  | - their physical dimension or relative location |  | P |
| 8.6 | Marking of the switch position |  |  |

| IEC 60669-1 |  |  |  |
| :--- | :--- | :--- | ---: |
| Clause | Requirement + Test | Result - Remark | Verdict |

|  | Switches marked to indicate the switch position: they are so marked that the direction of movement of the actuating member to its different positions or the actual position is clearly indicated. |  | P |
| :---: | :---: | :---: | :---: |
|  | Switches having more than one actuating member: marking indicates the effect achieved by the operation |  | P |
|  | Marking clearly visible on the front of the switch |  | P |
|  | Not possible to fix cover, cover plate, or removable actuating members in an incorrect position |  | P |
|  | Symbols for "on" and "off" not used for indication of switch positions unless clearly indicate the direction of movement of the actuating members |  | P |
| 8.7 | Additional requirements for marking |  |  |
|  | Special precautions necessary to take when installing the switch: details of these and clear information given in an instruction sheet which accompanies the switch |  | P |
|  | Instruction sheets are written in the official language(s) of the country in which the switch is to be sold |  | P |
| 8.8 | Durability |  |  |
|  | Marking durable and easily legible. Test: 15 s with water and 15 s with $95 \%$ n-hexane. |  | P |
| 9 | CHECKING OF DIMENSIONS |  |  |
|  | Switches and boxes comply with the appropriate standard sheets, if any |  | N/A |
| 10 | PROTECTION AGAINST ELECTRIC SHOCK |  |  |
| 10.1 | Prevention of access to live parts |  |  |
|  | Switches: live parts not accessible |  | P |
|  | Switches designed to be fitted with pilot lights supplied at voltage other than ELV have means to prevent direct contact with the lamp |  | N/A |
|  | Specimen is mounted as in normal use and fitted with conductors as specified |  | P |
|  | Test probe B of IEC 61032 is applied in every possible position, an electrical indicator with a voltage between 40 V and 50 V being used to show contact with the relevant part |  | P |
|  | Switches having enclosures or covers in thermoplastic or elastomeric material: additional test carried out at $35^{\circ} \mathrm{C} \pm 2{ }^{\circ} \mathrm{C}$. Switches are subjected for 1 min to a force of 75 N , applied through the tip of test probe 11 of IEC 61032 |  | N/A |
|  | Test finger applied to thin-walled knock-outs with a force of 10 N |  | P |

| IEC 60669-1 |  |  |  |
| :--- | :--- | :--- | ---: |
| Clause | Requirement + Test | Result - Remark | Verdict |

|  | During the test: switches not deform and no live parts accessible with test probe 11 of IEC 61032 |  | P |
| :---: | :---: | :---: | :---: |
| 10.2 | Requirements for operating parts |  |  |
|  | Knobs, operating levers, push buttons, rockers and the like: of insulating material, unless: |  | P |
|  | - accessible metal parts separated from metal parts of mechanism by double or reinforced insulation, or |  | N/A |
|  | - reliably connected to earth |  | N/A |
|  | Requirement does not apply to removable keys or intermediate parts, such as chains or rods |  | N/A |
| 10.3 | Requirements for accessible metal parts |  |  |
| 10.3.1 | Accessible parts of switches when in normal use are made of insulating material as specified. |  | P |
| 10.3.2 | Metal covers or cover plates are protected by supplementary insulation made by insulating linings or insulating barriers. |  | N/A |
|  | Insulating linings or insulating barriers: |  |  |
|  | - cannot be removed without being permanently damaged, or designed that |  | N/A |
|  | - cannot be replaced in an incorrect position; if they are omitted, accessories are rendered inoperable or manifestly incomplete; there is no risk of accidental contact between live parts and metal covers or cover plates; precautions are taken to prevent creepage distances or clearances becoming less than the values specified in clause 23 |  | N/A |
|  | Linings or barrier comply with the tests of clauses 16 and 23 |  | N/A |
| 10.3.3 | Earthing of metal covers or cover plates: connection of low resistance |  | N/A |
| 10.4 | Requirements for insulation of the mechanism |  |  |
|  | Metal parts of the mechanism which are not insulated from live parts: not protrude from enclosure |  | P |
|  | Switches operated by means of a removable key or similar device: metal parts of mechanism insulated from live parts |  | N/A |
| 10.5 | Requirements for insulation of the mechanism with respect to the surrounding environment |  |  |
|  | Metal parts of mechanism not accessible and insulated from accessible metal parts, unless |  | N/A |
|  | - separated from live parts (creepage distances and clearances have at least twice the value specified in clause 23), or |  | N/A |
|  | - reliably connected to earth |  | N/A |

| IEC 60669-1 |  |  |  |
| :--- | :--- | :--- | ---: |
| Clause | Requirement + Test | Result - Remark | Verdict |

|  | Unenclosed stack-type switches having a metal spindle pivoting in a metal base plate: creepage distances and clearances between live parts and the spindle, and between metal parts of the mechanism and base plate, have at least twice the values specified in clause 23 |  | N/A |
| :---: | :---: | :---: | :---: |
| 10.6 | Requirements for switches operated indirectly |  |  |
|  | Switches operated by means of a removable key or an intermediate part: key or an intermediate part can only touch parts which are insulated from live parts |  | N/A |
|  | Key or intermediate part: insulated from metal parts of mechanism, unless |  | N/A |
|  | Creepage distances and clearances between live parts and metal parts of mechanism have at least twice the values specified in clause 23 |  | N/A |
| 10.7 | Requirements for switches with replaceable pull cord |  |  |
|  | Cord-operated switches: impossible to touch live parts when fitting or replacing the pull cord |  | N/A |
| 11 | PROVISION FOR EARTHING |  |  |
| 11.1 | General |  |  |
|  | Accessible metal parts: provided with, or permanently and reliably connected to, an earthing terminal (does not apply to the metal cover plates mentioned in 10.3.2) |  | N/A |
|  | Small screws and the like, isolated from live parts, are not considered as accessible parts which can become live in the event of an insulation fault |  | N/A |
| 11.2 | Earthing terminals |  |  |
|  | Earthing terminals: with screw clamping or screwless terminals and comply with clause 12 |  | N/A |
| 11.3 | Requirements for surface-type switches |  |  |
|  | Surface-type switches with an enclosure of insulating material, with IP > X0 and more than one cable inlet, are provided with: |  |  |
|  | - an internal fixed earthing terminal, or |  | N/A |
|  | - adequate space for a floating terminal allowing the connection of an incoming and outgoing conductor |  | N/A |
| 11.4 | Test for earthing connection |  |  |
|  | Connection between earthing terminal and accessible metal parts: of low resistance |  | N/A |
|  | Test current equal to 1,5 In or $25 \mathrm{~A}(\mathrm{~A})$..................: |  |  |
|  | Resistance $\leq 0,05 \Omega(\Omega)$......................................: |  |  |
|  |  |  |  |

| 12 | TERMINALS |  |  |

| IEC 60669-1 |  |  |  |
| :--- | :--- | :--- | ---: |
| Clause | Requirement + Test | Result - Remark | Verdict |

| 12.1 | General |  | P |
| :---: | :---: | :---: | :---: |
|  | Switches provided with screw-type terminals or with screwless terminals |  |  |
|  | Clamping means of terminals: not serve to fix any other components |  | P |
|  | All the test on terminals, with the exception of the test of 12.3 11, made after the test of 15.1 |  | P |
|  | Rigid solid conductors shall be of class 1 , rigid stranded conductors shall be of class 2 and flexible conductors shall be of class 5 according to IEC 60228 |  | P |
| 12.2 | Terminals with screw clamping for external copper conductors |  |  |
| 12.2.1 | Terminals with screw clamping having crosssectional areas as shown in Table 4 |  | N/A |
|  | - for rigid copper conductors only, or |  | N/A |
|  | - for both rigid and flexible copper conductors (tests carried out with rigid and then repeated with flexible conductors) |  | N/A |
|  | Rated current (A) ...................................................: |  |  |
|  | Type of conductor (rigid / flexible) ...........................: |  |  |
|  | Smallest / largest cross-sectional area ( $\mathrm{mm}^{2}$ ) ..........: |  |  |
|  | Diameter of largest conductor (mm) ........................: |  |  |
|  | Figure of terminal.................................................: 1 | $1 / 2 / 3 / 4 / 5$ |  |
|  | Minimum diameter $D$ (minimum dimensions) of conductor space: required (mm); measured (mm)....: |  | N/A |
| 12.2.2 | Terminals allow the conductor to be connected without special preparation |  | N/A |
| 12.2.3 | Terminals with screw clamping have adequate mechanical strength |  | N/A |
|  | Screws and nut for clamping the conductors have metric ISO thread or a comparable thread |  | N/A |
|  | Screws not of soft metal such as zinc or aluminium |  | N/A |
| 12.2.4 | Terminals with screw clamping are resistant to corrosion |  | N/A |
| 12.2.5 | Terminals with screw clamping clamp the conductor(s) without undue damage to the conductor(s) | See appended table 12.2.5 | N/A |
|  | For screws having a hexagonal head with slot for tightening, test shall be made twice, first the torque applying to the hexagonal head and then applying the torque by means of a screwdriver |  | N/A |
|  | During the test: conductor not slip out, no break near clamping unit and no damage |  | N/A |
| 12.2.6 | Terminals with screw clamping clamp the conductor reliably between metal surfaces | See appended table 12.2.6 | N/A |

| IEC 60669-1 |  |  |  |
| :--- | :--- | :--- | ---: |
| Clause | Requirement + Test | Result - Remark | Verdict |

|  | During the test: conductor not move noticeably |  | N/A |
| :---: | :---: | :---: | :---: |
| 12.2.7 | Terminals with screw clamping are designed or placed that the conductor cannot slip out while the clamping screws or nuts are tightened | See appended table 12.2.7 | N/A |
|  | After the test: no wire of the conductor escaped outside the clamping unit thus reducing creepage distances and clearances to values lower than those indicated in table 23 |  | N/A |
| 12.2.8 | Terminals not work loose from their fixing to the switch |  | N/A |
|  | Movement of the terminal is allowed as long as it is sufficiently limited so as to prevent noncompliance with this document |  | N/A |
|  | Use of sealing compound or resin is considered to be sufficient, provided that: |  |  |
|  | - the sealing compound or resin is not subject to stress during normal use, and |  | N/A |
|  | - the effectiveness of the sealing compound or resin is not impaired by temperatures attained by the terminal |  | N/A |
|  | Torque test: |  |  |
|  | - rated current (A) ................................................: |  |  |
|  | - solid rigid copper conductor of the largest crosssectional area ( $\mathrm{mm}^{2}$ ) (table 4) |  |  |
|  | - torque (Nm) (table 5 or appropriate figures 1, 2, 3, <br> 4) |  |  |
|  | Screws and nuts tightened and loosened 5 times. During the test: terminals not work loose and show no damage |  | N/A |
| 12.2.9 | Clamping screws or nuts of earthing terminals: adequately locked against accidental loosening, not possible to loosen them without the aid of a tool |  | N/A |
| 12.2.10 | Earthing terminals: no risk of corrosion |  | N/A |
|  | Body of brass or other metal no less resistant to corrosion |  | N/A |
|  | If the body is a part of a frame or enclosure of aluminium alloy, precautions are taken to avoid the risk of corrosion |  | N/A |
| 12.2.11 | Pillar terminals: distance g no less than the value specified in figure 1: required (mm); measured (mm): |  | N/A |
|  | Mantle terminals: distance g no less than the value specified in figure 5: required (mm); measured (mm): |  | N/A |
| 12.2.12 | Lug terminals: |  | N/A |
|  | - used only for switches having rated current $\geq 40 \mathrm{~A}$ |  | N/A |
|  | - fitted with spring washers or equally effective locking means |  | N/A |
| 12.3 | Screwless terminals for external copper conductors |  |  |

| IEC 60669-1 |  |  |  |
| :--- | :--- | :--- | ---: |
| Clause | Requirement + Test | Result - Remark | Verdict |

| 12.3.1 | Screwless terminals of the type suitable for: |  |  |
| :---: | :---: | :---: | :---: |
|  | - for rigid copper conductors only, or |  | N/A |
|  | - for both rigid and flexible copper conductors (tests carried out with rigid and then repeated with flexible conductors) |  | P |
|  | 12.3 is not applicable to switches provided with |  |  |
|  | - screwless terminals requiring the fixing of special devices to the conductors before clamping in the screwless terminal |  | N/A |
|  | - screwless terminals requiring twisting of the conductors |  | N/A |
|  | - screwless terminals providing direct contact to the conductors by means of edges or points penetrating the insulation |  | N/A |
| 12.3.2 | Screwless terminals provided with clamping units which allow the proper connection of rigid or of rigid and flexible conductors having nominal crosssectional areas as shown in table 8 |  | P |
|  | Rated current (A) ...................................................: | 10 |  |
|  | Type of conductor (rigid / flexible)...........................: | RIGID AND FLEXIBLE |  |
|  | Smallest / largest cross-sectional area (mm ${ }^{2}$ )..........: | 1,5/2,5 |  |
|  | Diameter of largest rigid conductor (mm) .................: | 2,13 |  |
|  | Diameter of largest flexible conductor (mm).............: | 2,21 |  |
| 12.3.3 | Screwless terminals allow the conductor to be connected without special preparation |  | P |
| 12.3.4 | Parts of screwless terminals intended for carrying current of materials as specified in 22.5 |  | P |
| 12.3.5 | Screwless terminals clamp specified conductors with sufficient contact pressure without undue damage to the conductor |  | P |
|  | Conductor clamped between metal surfaces |  | P |
| 12.3.6 | It is clear how the connection and disconnection of the conductors is to be made |  | P |
|  | Disconnection of a conductor require an operation, other than a pull, so that can be made manually with or without a general-purpose tool |  | P |
|  | It is not possible to confuse the opening for the use of a tool with the opening intended for the conductor |  | P |
| 12.3.7 | Screwless terminals intended for the interconnection of two or more conductors: |  |  |
|  | - the clamping of one of the conductors is independent of the clamping of the other conductor(s) |  | P |
|  | - during the connection or disconnection the conductors can be connected or disconnected either at the same time or separately |  | P |

| IEC 60669-1 |  |  |  |
| :--- | :--- | :--- | ---: |
| Clause | Requirement + Test | Result - Remark | Verdict |

|  | - each conductor introduced in a separate clamping unit |  | P |
| :---: | :---: | :---: | :---: |
|  | It is possible clamp securely any number of conductors up to the maximum as designed. Number of conductors; Nominal cross-sectional area ( $\mathrm{mm}^{2}$ ) $\qquad$ | $2 \times 2.5$ | P |
| 12.3.8 | Screwless terminals: adequate insertion obvious and over-insertion prevented |  | P |
|  | Screwless terminals of switches: undue insertion of the conductor prevented by a stop if further insertion is liable to reduce creepage distances and/or clearances required in table 23, or to influence the mechanism |  | P |
| 12.3.9 | Screwless terminals properly fixed to the switch |  | P |
|  | Not work loose when conductors are connected or disconnected |  | P |
|  | Self-hardening resins used to fix terminals which are not subject to mechanical stress |  | N/A |
| 12.3.10 | Screwless terminals withstand mechanical stresses occurring in normal use | See appended table 12.3.10 | P |
|  | During application of the pull, conductor not come out of the terminal |  | P |
|  | Test with apparatus shown in figure 9 | See appended table 12.3.10 | P |
|  | During the test conductors not move noticeably in the clamping unit |  | P |
|  | After these tests: neither terminals nor clamping means have worked loose and conductors show no deterioration |  | P |
| 12.3.11 | Screwless terminals withstand electrical and thermal stresses occurring in normal use | See appended table 12.3.11 | P |
|  | After the test: inspection show no changes |  | P |
|  | Repetition of test according to 12.3.10: screwless terminals withstand mechanical stresses occurring in normal use | See appended table 12.3.11 | P |
|  | During application of the pull conductor not come out of the terminal |  | P |
|  | Test with apparatus shown in figure 10 | See appended table 12.3.11 | P |
|  | - measured after $24^{\text {th }}$ and $192^{\text {th }}$ temperature cycle |  | P |
|  | - measured after any three of $48^{\text {th }}, 72^{\text {th }}, 96^{\text {th }}, 120^{\text {th }}$, $144^{\text {th }}$ or $168^{\text {th }}$ temperature cycle |  | P |
|  | During the test conductors not move noticeably in the clamping unit |  | P |
|  | After these tests: neither terminals nor clamping means have worked loose and conductors show no deterioration |  | P |

| IEC 60669-1 |  |  |  |
| :--- | :--- | :--- | ---: |
| Clause | Requirement + Test | Result - Remark | Verdict |

| IEC 60669-1 |  |  |  |
| :--- | :--- | :--- | ---: |
| Clause | Requirement + Test | Result - Remark | Verdict |

|  | - held in place at two or more points by effective fixings |  | P |
| :---: | :---: | :---: | :---: |
|  | - fixed by means of a single fixing, e.g. by a screw, provided that they are located by another means (e.g. by a shoulder) |  | N/A |
|  | Where the fixing of covers, cover plates or actuating members of switches of design A serves to fix the main part there are means to maintain the main part in position, even after removal of the covers, cover plates or actuating members. |  | N/A |
| 13.3.2 | Covers, cover plates or actuating members whose fixing is of the screw-type: |  |  |
|  | Compliance checked by inspection only |  | N/A |
| 13.3.3 | Covers, cover plates or actuating members whose fixing is not dependent on screws and whose removal is obtained by applying a force in a direction approximately perpendicular to the mounting / supporting surface (see table 12): |  |  |
|  | - when their removal may give access, with the test probe B of IEC 61032, to live parts: | by the tests of 20.5 | N/A |
|  | - when their removal may give access, with the test probe B of IEC 61032, to non-earthed metal parts separated from live parts in such a way that creepage distances and clearances have the values at least equal to those shown in table 23: | by the tests of 20.6 | N/A |
|  | - when their removal may give access, with the test probe B of IEC 61032, only to | by the tests of 20.7 | N/A |
|  | - insulating parts, or |  | N/A |
|  | - earthed metal parts, or |  | N/A |
|  | - metal parts separated from live parts in such a way that creepage distances and clearances have at least twice the values shown in table 23 , or |  | N/A |
|  | - live parts of SELV circuits not greater than 25 <br> V AC and 60 V DC: |  | N/A |
| 13.3.4 | Covers, cover-plates or actuating members whose fixing is not dependent on screws and whose removal is obtained by using a tool, in accordance with the manufacturer's instructions given in an instruction sheet or catalogue: |  |  |
|  | By the same tests of 13.3 .3 except that the covers, cover plates, actuating members or parts of them need not come out when applying a force not exceeding 120 N in directions perpendicular to the mounting / supporting surface |  | N/A |
| 13.4 | Openings in normal use |  |  |
|  | Switches: no free openings in their enclosures according to their IP classification |  | N/A |
| 13.5 | Attachment of knobs |  |  |
|  | Knobs of rotary switches securely attached to the shaft or part operating the mechanism |  | N/A |
|  | - axial pull be applied for 1 min to try to pull off the actuating member |  | N/A |

| IEC 60669-1 |  |  |  |
| :--- | :--- | :--- | ---: |
| Clause | Requirement + Test | Result - Remark | Verdict |

|  | - axial pull is likely to be applied in normal use, the force is 30 N |  | N/A |
| :---: | :---: | :---: | :---: |
|  | - axial pull is unlikely to be applied in normal use, the force is 15 N |  | N/A |
|  | - knob of switches having only one direction of operation: turned 100 times in the reverse direction |  | N/A |
|  | During the test: knob not become detached |  | N/A |
| 13.6 | Mounting means |  |  |
|  | Screws or other means for mounting the switch on a surface or in a box or enclosure: easily accessible from the front |  | N/A |
|  | Fixing means not serve any other fixing purpose |  | N/A |
| 13.7 | Combination of switches |  |  |
|  | Combinations of switches, or of switches and socket-outlets, comprising separate bases: correct position of each main part is ensured |  | N/A |
|  | Fixing of each main part be independent of the fixing of the combination to the mounting surface |  | N/A |
| 13.8 | Accessories combined with switches |  |  |
|  | Accessories combined with switches: comply with their standard |  | N/A |
| 13.9 | Surface-type switches having an IP code higher than IP20 |  |  |
|  | Surface-type switches with IP > 20 are in according to their classification when fitted with conduits or with sheathed cables |  | N/A |
|  | Surface-type switches with IPX4, IPX5 and IPX6 have provisions for opening a drain hole |  | N/A |
|  | Switches provided with a drain hole: it is not less than 5 mm in diameter, or $20 \mathrm{~mm}^{2}$ in area with a width and a length not less than 3 mm ..................... | $\varnothing \quad \mathrm{mm} / \mathrm{mm}^{2}$ | N/A |
|  | Drain hole: effective |  | N/A |
|  | Lid springs (if any): of corrosion resistant material (bronze or stainless steel) |  | N/A |
| 13.10 | Installation in a box |  |  |
|  | Switches to be installed in a box: conductor ends can be prepared after the box is mounted in position, but before the switch is fitted in the box |  | N/A |
|  | Main part has adequate stability when mounted in the box |  | N/A |
| 13.11 | Connection of a second current-carrying conductor |  |  |
|  | Surface-type switches with IP > IPX0, pattern numbers 1,5 and 6 , with more than one inlet opening, provided with: |  |  |
|  | - fixed additional terminal complying with the requirements of clause 12 , or |  | N/A |
|  | - adequate space for a floating terminal |  | N/A |

| IEC 60669-1 |  |  |  |

| Clause | Requirement + Test | Result - Remark | Verdict |

|  | - samples number. | See table "Summary of testing" |  |
| :---: | :---: | :---: | :---: |
|  | During the test: copper wire F not melt, specimens function correctly, no sustained arcing or welding of contacts |  | P |
|  | Reduced electric strength per clause 16 | See appended table 19.3 | P |
|  | Reduced temperature rise test per clause 17 | See appended table 19.3 | P |
|  | After these tests, it is possible to make and break the switch by hand in the test circuit and the specimen not show: |  |  |
|  | - wear impairing further use |  | P |
|  | - discrepancy between the position of the actuating member and that of the moving contacts |  | P |
|  | - deterioration of the enclosures, insulating lining or barriers |  | P |
|  | - loosening of electrical or mechanical connections |  | P |
|  | - seepage of sealing compound |  | P |
|  | - displacement of the moving contacts of switches of pattern numbers 2,3 or $6 / 2$ |  | P |
| 20 | MECHANICAL STRENGTH |  |  |
| 20.1 | General |  |  |
|  | Accessories, surface mounting boxes, screwed glands and shrouds have adequate mechanical strength so as to withstand the stresses imposed during installation and use |  | P |
| 20.2 | Pendulum hammer test |  |  |
|  | For all types of switches and for boxes: impact test (9 blows) | See appended table 20.2 | P |
|  | After the test: no damage, live parts no become accessible |  | P |
| 20.3 | Test on the main parts of surface-type switches |  |  |
|  | Main parts of surface-type switches are first fixed to a cylinder of rigid steel sheet of radius equal to 4,5 times the distance between fixing holes (mm)... |  | N/A |
|  | Main parts are then fixed in a similar manner to a flat steel sheet |  | N/A |
|  | Torque applied to fixing screws ( Nm ).................... | 0,5 Nm/1,2 Nm |  |
|  | During and after the test: main parts show no damage |  | N/A |
| 20.4 | Screwed glands |  |  |
|  | Screwed glands of switches with that have IP code higher than IP20: torque test |  |  |
|  | - diameter of cylindrical metal test rod (mm)............: |  |  |
|  | - type of material ....................................................: | metal / moulded material |  |
|  | - torque for 1 min (table 22) (Nm) .........................: |  |  |

| IEC 60669-1 |  |  |  |
| :--- | :--- | :--- | ---: |
| Clause | Requirement + Test | Result - Remark | Verdict |

|  | After the test: no damage of glands and enclosure of the specimens |  | N/A |
| :---: | :---: | :---: | :---: |
| 20.5 | Covers, cover plates or actuating members - accessibility to live parts |  |  |
| 20.5.1 | General |  |  |
|  | Force necessary for covers, cover-plates or actuating members to come off or not to come off (accessibility with the test finger to live parts) |  |  |
| 20.5.2 | Verification of the non-removal of covers, cover-plates or actuating member |  |  |
|  | Force applied for 1 min in direction perpendicular to the mounting surface $\qquad$ | 40 N / 80 N | N/A |
|  | Covers, cover-plates or actuating members not come off |  | N/A |
|  | Test repeated on new specimens with a sheet of hard material, $1 \mathrm{~mm} \pm 0,1 \mathrm{~mm}$ thick, fitted around the supporting frame (fig. 13) |  | N/A |
|  | Covers, cover-plates or actuating members not come off |  | N/A |
|  | After the test: no damage |  | N/A |
| 20.5.3 | Verification of the removal of covers, cover plates or actuating members |  |  |
|  | Force not exceeding 120 N applied 10 times in direction perpendicular to the mounting / supporting surface: covers, cover-plates or actuating members come off |  | P |
|  | Test repeated on new specimens with a sheet of hard material, $1 \mathrm{~mm} \pm 0,1 \mathrm{~mm}$ thick, fitted around the supporting frame (fig. 13) |  | P |
|  | Covers, cover-plates or actuating members come off |  | P |
|  | After the test: no damage |  | P |
| 20.6 | Covers, cover plates or actuating members - accessibility to non-earthed metal parts separated from live parts |  |  |
|  | Test is made as described in 20.5, but applying, for 20.5.2, the following forces: | $10 \mathrm{~N} / 20 \mathrm{~N}$ | P |
| 20.7 | Covers, cover plates or actuating members - accessibility to insulating parts, earthed metal parts, the live parts of SELV $\leq 25$ V AC or metal parts separated from live parts |  |  |
|  | Test is made as described in 20.5, but applying, for 20.5.2, the force of 10 N for all covers, cover plates, or actuating members |  | N/A |
| 20.8 | Covers, cover plates or actuating members - application of gauges |  |  |
|  | Test with gauge of figure 14 applied according to figure 15 for verification of the outline of covers, cover-plates or actuating members: distances between face $C$ of gauge and outline of side under test, not decrease.. | complying / not complying |  |
| 20.9 | Grooves, holes and reverse tapers |  |  |

| IEC 60669-1 |  |  |  |
| :--- | :--- | :--- | ---: |
| Clause | Requirement + Test | Result - Remark | Verdict |

|  | Test with gauge according to figure 17 applied as shown in figure $18(1 \mathrm{~N})$ : gauge not enter more than 1 mm . $\qquad$ | complying / not complying |  |
| :---: | :---: | :---: | :---: |
| 20.10 | Additional test for cord-operated switch |  |  |
|  | Operating members of cord-operated switch have adequate strength |  | N/A |
|  | Pull test: pull 100 N for 1 min (normal use); pull of 50 N for 1 min (unfavourable direction). After the test: |  |  |
|  | - switch show no damage |  | N/A |
|  | - operating member not broken and cord-operated switch still operate |  | N/A |
| 21 | RESISTANCE TO HEAT |  |  |
| 21.1 | General |  |  |
|  | Switches and boxes are sufficiently resistant to heat |  | P |
|  | Decorative parts are not subjected to the test |  | N/A |
| 21.2 | Basic heating test |  |  |
|  | Switches kept for 1 h in a heating cabinet at a temperature of $100{ }^{\circ} \mathrm{C} \pm 2^{\circ} \mathrm{C}$ |  |  |
|  | During the test: no change impairing their further use and sealing compound, if any, not flow |  | P |
|  | After the test: no access to live parts, markings still legible |  | P |
| 21.3 | Ball-pressure test on parts of insulating material necessary to retain currentcarrying parts and parts of the earthing circuit in position |  |  |
|  | Parts of insulating material necessary to retain current-carrying parts and parts of the earthing circuit in position: ball-pressure test ( $1 \mathrm{~h}, 125^{\circ} \mathrm{C}$ ) | See appended table 21.3 | P |
| 21.4 | Ball-pressure test on parts of insulating material not necessary to retain current-carrying parts and parts of the earthing circuit in position |  |  |
|  | Parts of insulating material not necessary to retain current-carrying parts and parts of the earthing circuit in position, even though in contact with them: ball-pressure test (1 h) | See appended table 21.4 | P |
| 22 | SCREWS, CURRENT-CARRYING PARTS AND CONNECTIONS |  |  |
| 22.1 | General |  |  |
|  | Connections withstand mechanical stresses |  | P |
|  | Thread-forming or thread-cutting screws used only if supplied together with the piece in which they are intended to be inserted |  | N/A |
|  | Thread-cutting screws intended to be used during installation are captive with the relevant part of the accessory |  | N/A |
|  | Screws and nuts which transmit contact pressure are of metal and are in engagement with a metal thread |  | N/A |

| IEC 60669-1 |  |  |  |
| :--- | :--- | :--- | ---: |
| Clause | Requirement + Test | Result - Remark | Verdict |

|  | Threaded part torque test | See appended table 22.1 | N/A |
| :---: | :---: | :---: | :---: |
| 22.2 | Correct insertion of screws |  |  |
|  | Screws in engagement with a thread of insulating material: correct introduction into the screw hole or nut ensured |  | N/A |
| 22.3 | Contact pressure of electrical connections |  |  |
|  | Contact pressure: not transmitted through insulating material other than ceramic, pure mica or other material no less suitable unless there is sufficient resiliency in metallic parts |  | P |
| 22.4 | Screws and rivets, used both as electrical and mechanical connections |  |  |
|  | Screws and rivets which serve as electrical as well as mechanical connections shall be locked against loosening and/or turning |  | N/A |
| 22.5 | Material of current-carrying parts |  |  |
|  | Current-carrying parts of metal having mechanical strength, electrical conductivity and resistance to corrosion adequate: |  |  |
|  | Requirement of 22.5 does not apply to screws, nuts, washers, clamping plates and similar parts of terminals |  | N/A |
|  | - copper |  | N/A |
|  | - alloy with at least $58 \%$ copper for parts made from cold-rolled sheet or with at least 50 \% copper for other parts |  | P |
|  | - stainless steel with at least $13 \%$ chromium and not more than 0,09 \% carbon |  | N/A |
|  | - steel with electroplated coating of zinc (ISO 2081): service condition ISO no. (1/2/3); IP (X0/X4/X5/X6); thickness ( $\mu \mathrm{m}$ ) |  | N/A |
|  | - steel with electroplated coating of nickel and chromium (ISO 1456): service condition ISO no. (2/3/4); IP (X0/X4/X5/X6); thickness ( $\mu \mathrm{m}$ ). |  | N/A |
|  | - steel with electroplated coating of tin (ISO 2093): service condition ISO no. (2/3/4); IP (X0/X4/X5/X6); thickness ( $\mu \mathrm{m}$ ) |  | N/A |
|  | Current-carrying parts subjected to mechanical wear: not of steel with electroplated coating |  | P |
|  | Metals having a great difference of electrochemical potential: not used in contact with each other |  | P |
| 22.6 | Contacts subjected to sliding actions |  |  |
|  | Contacts subjected to sliding action: of metal resistant to corrosion |  | P |
| 22.7 | Thread-forming and thread-cutting screws |  |  |
|  | Thread-forming screws and thread-cutting screws not used for the connection of current-carrying parts |  | N/A |

| IEC 60669-1 |  |  |  |
| :--- | :--- | :--- | ---: |
| Clause | Requirement + Test | Result - Remark | Verdict |

|  | Thread-forming screws and thread-cutting screws used to provide earthing continuity: not necessary to disturb the connection and at least two screws are used for each connection |  | N/A |
| :---: | :---: | :---: | :---: |
| 23 | CREEPAGE DISTANCES, CLEARANCES AND DISTANCES THROUGH SEALING COMPOUND |  |  |
| 23.1 | General |  |  |
|  | Creepage distances, clearances and distances through sealing compound no less than the values shown in table 23 | See appended table 23.1 | P |
|  | Sub clause 23.1 does not apply to pilot light units. Requirements for pilot light units are given in 13.16 |  | N/A |
| 23.2 | Insulating compound |  |  |
|  | Insulating compound: not protrude above the edge of the cavity in which it is contained |  | P |
| 24 | RESISTANCE OF INSULATING MATERIAL TO ABNORMAL HEAT, TO FIRE AND TO TRACKING |  |  |
| 24.1 | Resistance to abnormal heat and to fire |  |  |
|  | Parts of insulating material which might be exposed to thermal stresses due to electric effects and the deterioration of which might impair the safety are not unduly affected by abnormal heat and fire |  | P |
|  | Glow-wire test according to IEC 60695-2-10 and IEC 60695-2-11 | See appended table 24.1 | P |
| 24.2 | Resistance to abnormal heat and to fire |  |  |
|  | Parts of insulating material retaining live parts in position of switches with IP>X0: of material resistant to tracking |  | N/A |
|  | Tracking test with solution A of IEC 60112 | See appended table 24.2 | N/A |
| 25 | RESISTANCE TO RUSTING |  |  |
|  | Ferrous parts protected against rusting |  | P |
|  | Test: 10 min in a $10 \%$ solution of ammonium chloride in water at a temperature of $(+20 \pm 5)^{\circ} \mathrm{C} ., 10 \mathrm{~min}$ in a box containing air saturated with moisture at a temperature of $(+20 \pm 5)^{\circ} \mathrm{C}$., 10 min in a heating cabinet at a temperature of $(+100 \pm 5)^{\circ} \mathrm{C}$ |  |  |
|  | No signs of rust |  | P |
| 26 | EMC REQUIREMENTS |  |  |
| 26.1 | Immunity |  |  |
|  | No immunity tests necessary |  |  |
| 26.2 | Emission |  |  |
|  | No emission tests necessary |  |  |

## List of test equipment used:

A completed list of used test equipment shall be provided in the Test Reports when a Customer's Testing Facility according to CTF stage 1 or CTF stage 2 procedure has been used.
Note: This page may be removed when CTF stage 1 or CTF stage 2 are not used. See also clause 4.8 in OD 2020 for more details.
