

Specifications

Material - UV stabilised polycarbonate

IP rating - 66

Installation Instructions

To maintain IP rating, all conduit entries must be sealed with an appropriate sealant and applied according to the manufacturers instructions.

When mounting the box to a wall, drill holes for fasteners in the indicated position so that IP rating is maintained.

Box must be mounted to a flat, even surface.

IP rating is only achieved using the hagerblu WBWS range of switches.

Failure to follow the manufacturers instructions will void any warranty offer.
