Extension box

## Safety instructions

Installation, modification and disassembly of the product may only be carried out by an authorised electrician in accordance with the relevant installation standards and safety regulations of the country. The final installation must fulfil all the requirements of the latest Edition of IEE wiring and EN IEC 61439-2.

These instructions are an integral part of the product and must be kept for the entire lifetime of the product.

Please read these instructions carefully before starting any work and before using the product.

JN2E01S

| Reference extension boxes | Product designation | Height [mm] | Width [mm] | Depth [mm] |
|---------------------------|---------------------|-------------|------------|------------|
| JN2E01S                   | 250 A spreader box  | 303.5       | 615        | 165        |
| JN4E01S                   | 400 A spreader box  | 303.5       | 690        | 205        |
| JN8E01S                   | 800 A spreader box  | 303.5       | 846        | 205        |
