

Consumer Unit Design Evo Switch Disconnecter Incomer

For the distribution of power in a residential application, conforming to BS EN 61439-3 including Annex ZB (16kA rating).

VME113SPD

Design Evo is the board for use in applications where the consumer unit is located in a living area of the dwelling.

The single row range of consumer units with a 116A rated current (InA) have been designed for installations where the upstream overcurrent protection device (OCPD) is rated at 100A or below, the 116A (InA) is where the consumer unit can be used with a 16A generation set when the bi-directional RCBO can be installed at the far end of the busbar.

(This is not applicable in Dual Row enclosures)

Protection against transient over voltages, provided by factory fitted type 2 SPD.

Rated Conditional Short Circuit of the Assembly (I_{cc})	Annex ZB: 16kA rms at 250V, power factor 0.6 with equipment and arrangements specified in Hager's technical documentation/catalogue
Protection against electric shock	Consumer Unit shall be installed in an electrical system conforming to IE 60364 / BS 7671
Rated Diversity Factor (RDF) / Values of assumed loading	2 Way to 3 Way - 0.8, 4 Way to 5 Way - 0.7, 6 Way to 9 Way - 0.6, 10 Way and above - 0.5
<p>Note: RDF only applies to continuously and simultaneously loaded circuits. In principle, this means adjacent circuit breakers having a load on time exceeding 30 minutes or where a load not exceeding 30 minutes has an 'off' time less than the 'on' time will need to have the rated diversity factor applied as indicated.</p>
