## WGDL131NB

WGDL131NB

16AX 3G 1W switch;nb

Technical Features

|                                          |                    |
|------------------------------------------|--------------------|
| <strong>Electric current</strong>        |                    |
| Switching current                        | 16 A               |
| <strong>Voltage</strong>                 |                    |
| Rated voltage                            | 250 V              |
| <strong>Materials</strong>               |                    |
| Colour                                   | Bronze             |
| Surface finish                           | Matt               |
| Material                                 | Polycarbonate (PC) |
| Treatment                                | Varnished          |
| <strong>Controls and indicators</strong> |                    |
| Number of buttons                        | 3                  |
| <strong>Dimensions</strong>              |                    |
| Dimensions                               | 86 x 86 mm         |
| Built-in depth flush-mounted boxes       | 35 mm              |
| <strong>Safety</strong>                  |                    |
| Ingress Protection (IP) class            | IP20               |
| <strong>Architecture</strong>            |                    |
| Control/operation element                | Triple rocker      |
| <strong>Electric current</strong>        |                    |
| Rated current                            | 16 A               |
| <strong>Texts</strong>                   |                    |
| Switch mode                              | 1-way              |
| <strong>Sustainability</strong>          |                    |
| REACH-SVHC free                          | Yes                |
| RoHS conform                             | Yes                |
