

LF306PV

**Zekering PV Ø 10 x 38 mm 1000 V DC 6 A**

**Technische eigenschappen**

**Zekering**

|                    |           |
|--------------------|-----------|
| Kenmerken zekering | gPV       |
| Zekeringsgrootte   | 10.3 x 38 |

**Stroom / temperatuur**

|                 |     |
|-----------------|-----|
| Nominale stroom | 6 A |
|-----------------|-----|

**Vermogen**

|                                  |        |
|----------------------------------|--------|
| Totaal vermogensverlies onder IN | 2,40 W |
|----------------------------------|--------|

**Belangrijkste elektrische eigenschappen**

|                                                         |       |
|---------------------------------------------------------|-------|
| Nom. kortsluitafschakelvermogen Icn volgens IEC 60898-1 | 30 kA |
|---------------------------------------------------------|-------|

**Spanning**

|                   |               |
|-------------------|---------------|
| Type voeding      | DC            |
| Nominale spanning | 1000 - 1000 V |

**Uitvoering**

|                         |   |
|-------------------------|---|
| Afschakelkarakteristiek | C |
|-------------------------|---|
